of the

ILLUMINATING ENGINEERING SOCIETY

Volume 26 (Nos. 1-4) 1961

CONTENTS

	Page
Rationally Recommended Illumination Levels, by H. C. Weston	1
Progress in Electric Lamps, by H. G. Jenkins	17
Plastics, Yesterday, Today and Tomorrow, by C. L. Child	33
A Note on Quantities of Light, by J. G. Holmes	47
Presidential Address: Lighting and Research, by W. S. Stiles	53
Visual Problems on Motorways, by J. M. Waldram	66
Twenty-five Years of Stage Lighting Equipment, by F. P. Bentham	79
Retinal Illumination and Age, by R. A. Weale	95
Presentation of Honorary Fellowship to H.R.H. The Duke of Edinburgh	103
Modern Aids to Lighting Design-Computer Techniques, by H. E. Bellchambers, G. K. Lambert, and H. R. Ruff	107
Trotter-Paterson Memorial Lecture: The Long-Range Forecasting Problem of Meteorology, by Sir Graham Sutton	127
Nomenclature and Symbols Associated with Radiation Transfer Calculations	136
The Calculation of Illumination in Practical Lighting Design, by H. D. Einhorn	145
Pre-Determination of Direct Discomfort Glare, by H. D. Einhorn	154
